

Action Alert LB120—Useful Information Attached

**From Liz Rea, Public Policy Chair
March 6, 2017**

I got word today from Planned Parenthood of the Heartland regarding the upcoming Health and Human Services Committee hearing on LB120 scheduled for Wednesday, March 15th. As you know, AAUW-NE is in support of this bill. If you participated in legislative day nearly two weeks ago, you know also that LB120 was one of the four bills we focused on in the conversations we had with senators and legislative aides. We encouraged senators to support this bill and gave each of them a folder containing talking points about what LB120 would accomplish.

The attached “LB 120—Family Planning Access Expansion” came to my attention today. It is an excellent 2-page piece that I would like you to refer to when you contact your senator in support of this bill. Please refer to the website www.Nebraskalegislature.gov and click on the “Senators” link for correct contact information for your senator.

Contact can be in the form of a phone call to the senator’s office, an email message, or an in-person visit with the senator, legislative aide, or office staff member. If you choose to write a letter urging the senator to support LB120, please use the following format:

Senator’s Name
Legislative District Number, State Capitol
PO Box 94604
Lincoln, NE 68509-4604

Passage of LB120 would do much to provide necessary health care to Nebraska women and families who simply can’t afford it otherwise. At the same time, it would save our state money during a time when we face a significant budget deficit.

Thank you for contacting your senator to urge support for this important health care bill. Together we can make a difference.
